

# Jaeger Tri-Packs®

High-performance, free-flowing random spherical packing for scrubber and stripper applications. NSF certified for potable water contact.

Size		1"	2"	3.5"
Geometric Surface Area	ft <sup>2</sup> /ft <sup>3</sup>	85	48	38
Packing Factor	1/ft	28	16	12
Void Space	%	90.0	93.5	95.0
Bulk Density (reference: polypropylene)	lb <sub>m</sub> /ft <sup>3</sup>	6.2	4.2	3.3

**Jaeger Tri-Packs®** (all sizes) are NSF 61 (National Science Foundation) certified for potable water contact. Only virgin resin direct from a primary supplier is used to mold NSF certified Jaeger Tri-Packs®. This assures that the rigid requirements of NSF, including passing spot inspections of our production facility, are assured. A customer can purchase product in complete confidence that the integrity of their drinking water will be preserved.

IMPORTANT: The following supercedes Buyer's Documents. SELLER MAKES NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. No statements herein are to be construed as inducements to infringe any relevant patent. Under no circumstances shall Seller be liable for incidental, consequential or indirect damages for alleged negligence, breach of warranty, strict liability, tort or contract arising in connection with the product(s). Buyer's sole remedy and Seller's sole liability for any claims shall be Buyer's purchase price. Data and results are based on controlled or lab work and must be confirmed by Buyer by testing for intended conditions of use. The product(s) has not been tested for, and is therefore not recommended for, uses for which prolonged contact with mucous membranes, abraded skin, or blood is intended; or for uses for which implantation within the human body is intended.
